Lucky Ben Mine Project Update

May 27, 2021

Management is excited to announce that our request for a conditional use permit for the Arlise Gulch Road has been approved and we have the permit in hand. Time for this development is perfect as the road to Warren Idaho is now open and Groundhog Mining and Milling company will begin moving equipment on site.

We are also pleased to announce we have located two open stopes of the Arlise Mine which is located on one of our leased claims. Sampling of the exposed vein in Stope #2 resulted in the following assay results:

AU	AG	
.640	5.30	OZ/Ton
.693	7.50	OZ/Ton

In addition to the planned work for the Lucky Ben, we will complete extensive sampling on the Arlise Vein this season.
